

Hello anonymous. was told to talk to you, although I don't quite understand this vocabulary. I don't have much time, but I will try to have time to tell you something interesting. Constantine is a friend of mine, a man whom I here hold. It serves computers, and when we were able to connect across the gap to the Internet, he was one of the first who was able to use it. He talked about you a lot weird, but I'm probably like. It is difficult to say where the world is turned the wrong way, from us or from you. You probably already have read a lot about Engels-7 in the official report so I will try not to write hackneyed stuff, and talk about my life here. But something still stands. What would you never told representatives of the party new life, nor the wolves in their appeals, the reality is not what it seems. My grandfather was one of the first residents of the colony. He was sent to the gap on the fifth rocket in the year 73. It was sent mainly scientists and professionals in the Soviet Union were repressed. When the settlers, together with my grandfather have passed through the gap on the moon, they were actually naked in the field. Yeah, I guess you said that before to send here the civil, the dome was already completed and under it was constructed enough buildings to accommodate all. So that is not true. The dome on the site of the future city was completed in the best case half and all the experts instead of trying to explore a new planet, the builders, and in terrible conditions. Many machines that were supposed to facilitate the construction of the city was always breaking, but to fix them was allowed only to those engineers who were chosen for this party. That is, those who had fun, doing simple work, and people like my grandfather worked with his hands in construction of the dome. But Kirilenko was not enough, and he wanted to build near the town of camp, like the camps of the Gulag, who were you on earth, because he frankly didn't like is in a city where a bunch of exiled dissidents from the Soviet Union. And after the 78 year gap were closed, he could carry out any policy without looking at the Communist party. But in the year 82 Kirilenko died, you probably already know, has replaced him in the post of Secretary General of KPI-7 Mozhaisk, it was already at my father. Father says that Mozhaisky was a mediocre leader, not versed in Economics, spent a lot of money wasted, but generally often father calls him a dick. Mozhayskiy wanted to build communism by the precepts of Lenin, even put a monument in the Moscow area, with standing with outstretched arms Stalin and Kirilenko, whose back hugs the hands of Lenin, but Mozhaisky was put on a leadership position in the NKVD Volkova, played against him in '95 very cruel joke. Wolves first presented himself as their man for the workers and scientists secretly pitting them against the party, and then, when some people (now it is known that provocateurs) stoned red house, which was the entire top of the KPI-7 people took to the streets, and wolves have supported them, betraying the party. Mozhayskiy was arrested, some people close to him escaped in a jeep somewhere inside the planet, but no one knows what they later became. The wolves held elections, formed a Parliament, but after he chose the new President Engels-7, he finally removed his mask and slowly and surely crushed all the power for himself. I was born, when Volkov, after the coup had just chosen. Father says then we had a free press, people started to unite in cooperatives, but I don't remember. Remember, I am already from the days when wolves took over the entire power back and tighten the screws. Only if the party was covered by some ideals, that wolves simply stealing the budget and living on his posh dacha in Thermal, near where the hot springs at 89 Shawn Weera has built a little dome. I hope you have on earth, the Communists were replaced by honest people, and you now live wonderful, adapting the market economy to Soviet industry. And that was that. And now the gap is on the moon opened again and half a year ago through the efforts of Americans

through it managed to convey a strong signal and connect our computers to the ground the Internet. The wolves issued a ban on the use of the Internet, ordinary people declaring the relationship with the land a matter of national importance, but as I said, I was in the computer centre, Constantine. I'm 20. I study in the e-7ГУ on the doctor. Don't even know what I can do to talk about itself. Girls there, I found that it is not important in life. Knocks sit at home, read books, and only occasionally go to the University. I would like for Constantine to become a computer technician, but on the faculty of radio-electronics complex entrance test. Through Constantine to me there was a rumor that the moon is going to launch a rocket to the gap to give us the Engels-7 some technologies and send their Ministers to negotiate. I didn't tell Constantine that I want to try to get on a rocket and sent to earth. Constantine would say. I repulsed a fool. But I think I'm not the only one, and if I can get someone to join, then maybe we'll get it. I hope that in Russia I will find a place among your young and talented, and most importantly free youth. Although my grandmother was Ukrainian roots. Well there probably is now by the sea in Europe together with Russia. This is probably all. Constantine says that it's time for me to leave. Gonna be up all night learning patofiziologii, and think about how I'm going to get on a rocket.
